# GPS-Enabled Map Installation For Smartphone or Tablet*

Background – You can install a free mobile version of the Kaibab National Forest's Motor Vehicle Use Maps (MVUMs) on your smartphone or tablet either using the QR codes below or going to the Avenza PDF Maps website and click on "Get Maps" then type "Kaibab National Forest" in the search box. A Travel Map for the North Kaibab Ranger District is also available for a fee on the Avenza PDF Maps website.

Note – Even though the road designations depicted on the Travel Map are identical to the road designations depicted on the current MVUMs, the Travel Map is not the "official" MVUM. Therefore, the Travel Map should

be used as a supplement to the MVUM, not a substitute for it. The MVUM is the final authority should any discrepancies arise between the Travel Map and the MVUM.

Follow these steps to make use of the Kaibab National Forest's MVUMs through the Avenza PDF Maps App. *Note: it is necessary to have a QR code scanner reader to read and download the maps.*

Get the App – The Avenza PDF Maps Mobile App for your smartphone or tablet is available free from the Apple Store (iPhones and iPads), or from the Google Play Store (Android smartphones and tablets). Type "Avenza PDF Maps" into the app store's search function to locate and install the app.

Get the App – If your mobile device does not already have a QR code scanner, then download this application from either the Apple Store or Google Play Store. You can also choose a combination Barcode/QR code scanner to use for this as well.

Get the Maps – Use the QR code scanner to scan the QR codes below to obtain any of the Kaibab National Forest MVUMs.

Once the maps are scanned and downloaded using your QR code scanner, select your Avenza PDF Maps Mobile App to open them. Follow the instructions from Avenza on how to use the app specifically if you want to use the tracking feature for your vehicle while driving in the forest.

Williams

The maps will be in the download folder of the mobile device and will be available to use with or without the Avenza PDF Maps Mobile App. The app is a convenient feature to use for marking points of destinations and geo-referencing as well as tracking where your vehicle is located in reference to the forest.

Tusayan

The MVUMs provided by the forest are free; however, your wireless carrier may access data service charges if you use a 3G/4G/LTE connection instead of a Wi-Fi connection.

Android devices require an operating system 4.1 or higher, **Apple** devices use 6.0 or higher.*
